About me

As an experienced graphic designer with over 10 years of experience in graphic design, web design, and occasional video editing and 3D modeling, I specialize in creating visual solutions for print and digital media. Among other things, this includes the creation of catalogs, brochures, banners, web elements, and presentations, as well as professional preparation for the press. In addition to these skills, I am dedicated to photo retouching and WordPress site development. I work closely with clients to ensure that all requirements and deadlines are fully met.

I'm a user of tools like Photoshop, Illustrator, and Blender, and I'm constantly working to improve my skills, keeping up with the latest industry trends. I am looking for a position that offers opportunities for professional growth and continuous learning in the field of graphic design.
